Work Experience

- I'm a **Junior Web Developer** with an ambition to help clients to make their own Web designs come true in the most efficient and easy-to-use ways possible.
- I worked as a **freelancer**, which implies that I have an experience of working with clients in a real-time based evidence.
- I have a great **English language** verbal and written communication that would enable me to reach and comprehend most of the clients efficiently and in a suitable manner.
- In my web designs, I try to use the most recent **updates** in the field, so than I can be always updated and learn more about everyday **trends** in this field or even trends about designs.
- I'm mostly focused about the **client needs**. I try to make all the ideas of the client come true in a manner that he/she is the main controller of the design and functions of the page. The client would have a tremendous freedom in making the decision in his/her web page, and I would lend my hand to make the **client's expectations a reality**.
- Responded to queries on private messages or comments to address issues and resolve complaints.
- Built **reusable code** to utilize for other projects and to minimize costs.
- Created **responsive design** layouts using JavaScript and React JS, aiding smooth customer experiences.

Education History

Bachelor of Science in Pharmaceutical Studies:

Ain Shams University

Year of Graduation: 2021

- Master Degree in Clinical Pharmacy Department

Summary

- Hard working and effective junior web developer who has been in the field for 1 year until now. Bilingual, astute and deadline-driven. Seeking a developer position where a strong understanding of technology and a marketing background can be best utilized.
